OPERATE WITH CLARITY

Jibar School ERP

Jibar brings school administration, academics, finance, communication, and campus services into one structured workspace for leadership and staff.

https://jibar.co.zw/

People and access

Keep the school community organised while controlling what each user can see and do.

Students

Maintain learner profiles and the school records connected to each student.

Parents

Connect parents and guardians with the learners and information relevant to them.

Teachers and staff

Manage teaching and support-team records within the same operating system.

Admissions

Support the intake and organisation of new learners.

Roles and permissions

Give administrators, teachers, finance teams, and other users appropriate access.

Academic planning

Give teaching and administration teams a shared structure for the academic programme.

Classes and sections

Organise learners into the correct classes, streams, and sections.

Subjects and syllabus

Structure subjects and syllabus content for the school programme.

Assignments

Create and organise academic work for learners.

Timetables

Coordinate lessons, classes, and school schedules.

Attendance and assessment

Follow participation and academic progress from daily attendance through final promotion.

Student and staff attendance

Record daily attendance for learners and employees.

Examinations and schedules

Plan examination periods, papers, and related schedules.

Online examinations

Run structured digital assessments where they suit the school workflow.

Marks, grading, and results

Capture marks, apply grading structures, and distribute results.

Promotion

Support controlled learner progression between academic levels.

Finance and resources

Connect financial and operational resources with the records that explain them.

Fees and accounting

Manage school fees, payments, and related financial records.

Payroll

Organise employee payroll information and processing.

Fixed assets

Maintain records for the school's long-term physical assets.

Inventory

Track stock and operational supplies used across the school.

Leave

Manage employee leave requests and records.

Communication

Keep internal and school-community communication connected to the people it serves.

Internal messaging

Support direct communication between authorised users.

Media

Organise media used in school communication and content.

Email and SMS

Send relevant updates through familiar communication channels.

Campus services and administration

Coordinate the supporting services that shape everyday learner and campus life.

Childcare

Organise childcare information and related school services.

Library

Manage library resources and learner access.

Transport

Coordinate school transport information and services.

Hostel

Manage boarding and hostel records where applicable.

Sponsorship

Record and coordinate support provided to learners.

System administration

Manage public content, backups, updates, and other authorised system controls.

LEARN WITH CONFIDENCE

Khulani AI

Khulani AI helps schools turn trusted materials and curriculum goals into teaching resources, study tools, structured courses, and guided learner support.

https://khulani.io/

Material-based creation

Start with information the school already trusts instead of working from a blank page.

Quick Create

Upload a file, enter text, or reference a URL to begin creating learning resources.

Trusted source material

Ground generated resources in school-approved content and curriculum material.

StudyLM

Turn source material into several useful formats for teaching, revision, and independent study.

Notes and tutor lessons

Create structured explanations and lesson-style learning material.

Multiple-choice questions

Generate objective practice questions from the selected material.

Flashcards and vocabulary

Build recall activities for important terms, facts, and concepts.

Podcasts

Transform learning material into an audio study format.

Essay tests and worksheets

Create longer-form assessment and classroom practice activities.

Fill-in-the-blank activities

Generate focused exercises that strengthen recall and comprehension.

Khulani AI Tutor

Give learners guided support that remains connected to their learning context.

Diagnostic support

Identify what a learner understands and where more guidance may help.

Learning paths

Organise guided progress through a topic or learning objective.

Grounded questions and answers

Discuss learning material with references to relevant files and prior context.

Conversation history

Return to previous learning conversations and continue the work.

Course Hub

Build structured learning programmes rather than isolated pieces of content.

Course creation

Organise lessons and learning content into a structured course.

Course quizzes

Check understanding at appropriate points in the course.

Progress and certificates

Follow completion and recognise successful course participation.

Course podcasts

Add audio learning resources to the course experience.

My Subjects

Work with subject-focused support for the curricula used by Zimbabwean schools.

ZIMSEC subject support

Access subject-oriented learning help aligned with Zimbabwean school needs.

Cambridge subject support

Use curriculum-aware assistance for Cambridge learning programmes.

Teaching Tools

Help educators prepare practical classroom and assessment resources more efficiently.

Lesson plans

Create structured plans for teaching a topic or learning objective.

Question banks and essay tests

Prepare objective and extended-response assessment material.

Worksheets and rubrics

Create learner activities and clear assessment criteria.

Vocabulary resources

Build subject vocabulary and language-learning activities.

Shona and Ndebele support

Create relevant resources that support local-language teaching needs.

Study Tools

Give learners several ways to understand, practise, and revisit their work.

Curriculum tutors and personas

Choose guided learning support suited to a subject or learning approach.

Resource and test generators

Create additional practice and assessment material when it is needed.

Book and personal podcasts

Use audio to revisit books, notes, and personally selected material.

YouTube notes

Turn relevant video material into structured notes for review.

My Files and account management

Keep reusable material organised and manage the practical side of platform access.

My Files

Store and reuse learning material across creation and study workflows.

Billing and account controls

Review subscription information and manage authorised account settings.

MARKET YOUR SCHOOL WITH CLARITY

Jorar AI

Jorar gives your school team an AI-powered marketing workspace for brand strategy, content, websites, campaigns, audience intelligence, and publishing.

https://jorar.ai/

Brand foundation

Give every marketing task the same understanding of the school's identity, voice, and goals.

Brand Creation

Develop the foundations of a distinctive and consistent school brand.

Smart Brand DNA

Create reusable brand context that guides work across Jorar's modules.

Creative production

Produce useful campaign material without rebuilding the school's brand direction each time.

Mockup Studio

Visualise the school brand across realistic creative applications.

Social Posts Generator

Create platform-ready posts aligned with the school's Brand DNA.

Creative Package Generator

Prepare coordinated campaign assets for a shared marketing objective.

Video Ads

Develop video advertising concepts and creative material for school campaigns.

Web and conversion

Turn campaign ideas into digital experiences that help families take the next step.

Landing Page and Website Generator

Create branded pages and websites for the school and its campaigns.

Chatbot

Support website conversations and common questions through a branded assistant.

Campaign planning and distribution

Move from isolated posts to an organised communication and campaign rhythm.

Content Calendar

Plan school stories, campaigns, events, and publishing activity.

Email Marketing Automation

Create and coordinate branded email communication for relevant audiences.

Social Connections

Connect supported social channels for a more coordinated publishing workflow.

Marketing intelligence

Use school and market context to make more informed marketing decisions.

Brand CoPilot

Work with an AI assistant that understands the school's Brand DNA.

Competitor Intelligence

Review relevant competitor activity and positioning for planning context.

Social Listening

Follow relevant public conversations and signals around the school's market.

Partnerships and operations

Keep campaign relationships, files, and team responsibilities organised.

Influencer and Partner Manager

Organise potential advocates, partners, and campaign relationships.

My Files

Keep reusable brand and campaign assets available to the team.

Team Access

Coordinate authorised users and responsibilities within the marketing workspace.

A SOLUTION SHAPED AROUND YOUR SCHOOL

Let’s plan your school’s next steps.

Discuss your school’s priorities, branch structure, and rollout with our team. We will prepare a tailored proposal based on the workflows and support your school needs.

> **Start with a conversation and a school demonstration. Product scope, onboarding, and commercial terms are agreed directly with your school.**

Arrange a tailored school demonstration.

We will use the conversation to understand your school’s priorities, branch structure, and preferred next steps.
